

How to use?

Opening the pdf

- Click on the **Setting**  button in the top right corner
- Then select **Open file**

Use Snipping tool

- Click on the **Snipping tool**  to snip faces on artwork
- Select the face and if it's snipped properly then **Approve** else **Remove** it and try again.
- Select the six faces of artwork(Please select the smaller face first then the face opposite to it)
- You can also preview the faces using **Preview** button top right

Converting into the gltf

- Click on **Convert** in the top right corner. It will automatically install the gltf file.
